

REACH INFORMATION SHEET

INFORMATION ACCORDING TO ART. 33 NO. 2 REACH REGULATION EC NO 1907/2006, AND CANDIDATE LIST OF SUBSTANCES OF VERY HIGH CONCERN, SVHC

A number of Durgo's products contain brass components which are made of a brass alloy containing more than 0.1% by weight of lead; CAS No. 7439-92-1 a substance listed on the EC Candidate List of Substances of Very High Concern, SVHC.

The fact that a substance is listed on the Candidate List does not mean a ban on use, but only a requirement that the substance must be clearly declared so that the recipient can use the product in a safe manner.

All brass components that are in contact with drinking water are made of dezincification-resistant brass according to 4MS hygienic list and is approved in accordance with the requirements in BBR, the Swedish National Board of Housing, Building and Planning Building Regulations.

The following product groups contain components made of dezincification-resistant brass and brass with an alloy in which the lead content exceeds 0.1% by weight:

- Durgo Safety Valves type SV-55 and SV-77
- Durgo back flow prevention- and anti vacuum valves type VV-HF, VV-HFC, VV-VF, VV-VFC, VV-HT, VV-VT, VV-VTU
- Durgo Manifolds type VR-2
- Durgo Tap Valves
